### **McQ partners with Iridium Satellite Communications And Verizon Wireless**

**Fredericksburg, VA** – McQ Inc., a sensor system company, has entered a partnership with Iridium Satellite Communications Network developing applications for Commercial and Government customers. In addition to the partnership with Iridium, McQ has also partnered with Verizon Wireless on Machine to Machine applications developing cellular network products. McQ is already one of the nation's leading providers of sensor research, development and systems. These two partnerships will enhance McQ's product offering to commercial and government customers.

McQ, headquartered in Fredericksburg, Virginia, is recognized as the high technology leader in remote surveillance, security and environmental monitoring products. Leading the way as the first company to develop integrated sensor and imagery technology for surveillance purposes, McQ is also the first to interface multiple sensors into a fully integrated communications and data network. With almost 30 years of experience, McQ has earned a reputation for delivering rugged, state-of-the-art surveillance and remote sensor systems for a wide range of commercial and government clients. McQ specializes in custom solutions on the cutting edge of sensor technology.
